

Important Statement

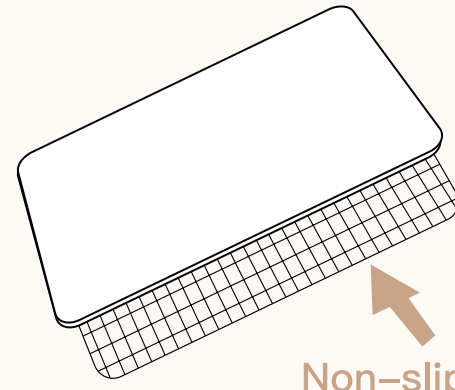

1. An initial odor may occur but will fade over with time.
2. Avoid sunlight and heat when using or drying the product. Use it in a well-ventilated area.
3. Do not soak the bath mat for long, as it will shorten its lifespan.
4. This fragile product should not collide with hard objects or fall from heights.
5. Do not touch colored liquids during use, as they can leave permanent stains.
6. This natural diatomaceous earth product may show micro-powder, color spots, small scratches, and other imperfections, which are normal and do not affect functionality.

Instructions for Use

For first-time use, wipe the bath mat with a damp cloth to remove dust, then let it dry in a ventilated area before using it normally.

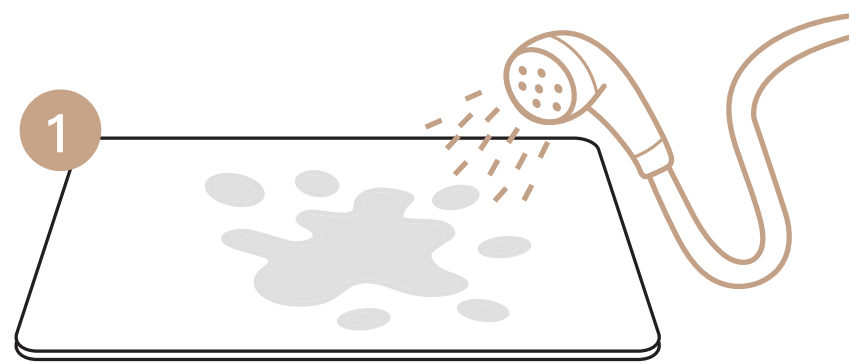

Place it on a stable surface. If the bath mat is unstable, use a rubber non-slip mat underneath to minimize the risk of slipping and falling.

Rinse dust and hair from the bath mat with water, then dry it in a cool, ventilated area.

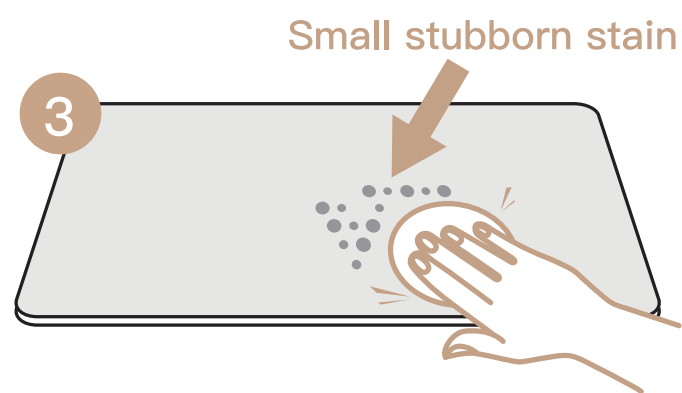

Maintenance Tips

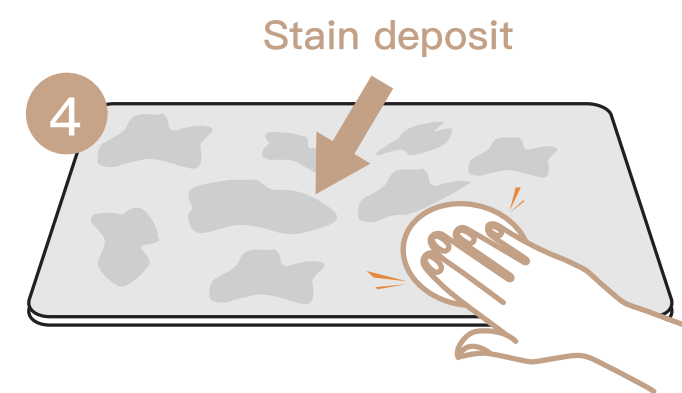

Rinse ordinary stains with running water. Then place the bath mat in a ventilated and cool place to dry.

Stubborn stains wash with a colourless detergent and leave to dry naturally.

Remove non-washable stains by sandpapering

Stain deposits occur after long-term use and the absorbency of the mats is reduced. Simply re-sand the surface with sandpaper
